SUMMARY

Data Analyst with 4 years of experience in data extraction, reporting and dashboard development. Specialized in validating datasets for accuracy and consistency using Python and SQL, transforming complex datasets into actionable insights, translating business requirements into high impact dashboards using Tableau, and collaborating with stakeholders for strategic decision-making.

EDUCATION

Anna University
Madras Institute of Technology

08/2018 - 07/2022
B.E. in Electronics Engineering

TECHNICAL SKILLS

Programming Languages: Python
Database & Querying: SQL
Visualization: Tableau
Tools & Libraries: Databricks, Microsoft Excel, Pandas, NumPy, Matplotlib, Git, Jira, Azure

EXPERIENCE

Data Analyst II 07/2022 - Present
Accenture

- Optimized **100+ SQL** queries involving joins, CTEs, window functions, and subqueries to extract and analyze large datasets, improving performance, report generation time, and database efficiency.
- Leveraged Pandas and NumPy in Python to refine **1 million+** healthcare records, reducing processing time by **30%** and improving data quality by removing inconsistencies, missing values, and outliers.
- Authored end-to-end data pipelines using **Python** and **SQL** to remove duplicate values, transform raw data into structured, analysis-ready datasets, lowering manual effort by **60%**, driving faster and accurate decisions.
- Performed end-to-end data quality checks using Excel exceeding **1 lakh** rows, ensuring accuracy for monthly reports used in executive-level data backed decisions.
- Designed **healthcare analytics** dashboards using **SQL aggregations** and **Excel pivot tables** to analyze patient trends, service utilization, and outcome metrics, reducing data retrieval and reporting time by **20%**.
- Built **15+** interactive Tableau dashboards to visualize KPIs and customer behavior, enhancing stakeholder communication and boosting strategic planning speed by **25%**.
- Integrated Tableau with three SQL databases, optimizing **20+** queries to reduce data retrieval time by **30%**, enhanced data visualization capabilities, resulting in faster insights.
- Streamlined optimized **SQL** queries within Databricks to process over **50 GB** datasets minimizing query execution time by **50%** and accelerating stakeholder access to real-time insights.
- Applied data **storytelling techniques** to connect KPIs, trends, and output quality metrics with business outcomes, improving stakeholder alignment and accelerating decision-making.
- Spearheaded **Agile** development practices through active sprint planning and stakeholder collaboration, ensuring 100% on-time delivery of sprint goals, improving team velocity by **20%** over 3 quarters

CERTIFICATION

- Certificate Programme in Data Analytics, Data Science and Machine Learning — IIT Delhi.
- GH-300 GitHub Copilot

ACHIEVEMENTS

- The Extra Mile Award – Recognized for staying Agile, Resilient and successfully prioritizing critical tasks to work more efficiently. Commended for championing the One Accenture Culture.
