SUMMARY

Software Development Engineer with over 3 years of experience designing, developing, and deploying scalable web applications using React.js, Redux Toolkit and Spring Boot. Specialized in developing reusable components with React.js, implementing RESTful APIs into front-end systems and robust unit/integration testing with Jest and React Testing Library and collaborating with cross-functional teams to deliver visually engaging and business-aligned web applications.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Java

Frontend Development: React.js, Redux Toolkit, HTML5, CSS3, SCSS

Backend & Database: Spring Boot, RESTful APIs, SQL, MongoDB

Tools & Technologies: Jest, React Testing Library, Postman, Git, GitHub, Jira, Jenkins CI/CD

EXPERIENCE

Software Development Engineer

Accenture

10/2022 - Present

React.js, Spring Boot, Redux, RESTful APIs, CSS, SCSS

- **Engineered** responsive and accessible web interfaces using React.js, delivering cross-browser compatible and high-performance UI components that reduced page load times by **35%** and improved overall user experience.
- **Constructed** reusable React components, leveraging **React Hooks** and managing global state with **Redux** to optimize UI rendering, enhance maintainability, and reduce feature development time by **40%**.
- **Revamped** UI responsiveness and performance across different devices and screen sizes, ensuring consistent behavior and seamless interactions, resulting in a **20%** increase in user retention and a **15%** boost in engagement metrics.
- **Implemented** scalable UI designs with React and CSS, delivering high-fidelity experiences aligned with Figma specifications, achieving **98%** design accuracy and maintainable code architecture.
- **Developed** and optimized **backend services** using Spring Boot and microservices, building modular REST APIs to improve data handling and API efficiency, achieving up to 30% faster response times.
- **Integrated** RESTful APIs and optimized data-fetching strategies using **Axios** and **React Hooks**, enhancing app performance and cutting UI data-loading times by **45%** through client-side tuning and asynchronous processing.
- **Partnered** with backend teams to align on API endpoint design, streamline data handling, and resolve integration bottlenecks, reducing feature delivery time by **25%** and lowering cross-team issue rates by **30%**.
- **Authored 150+ unit tests** using **Jest** and **React Testing Library**, maintaining over **90% test coverage** and reducing **production bugs** by **60%** through early detection and structured testing practices.
- **Spearheaded** Agile development practices through active sprint planning and stakeholder collaboration, ensuring 100% on-time delivery of sprint goals, improving **team velocity** by **20%** over **3** quarters, and contributing to improved release predictability.
- **Streamlined** version control and CI/CD workflows using Git, GitHub and Jenkins, automating deployments, managing **250+** code merges with **100%** delivery accuracy.
- **Demonstrated** end-to-end deployments across development, UAT, and production environments, accelerating release cycles by **2 weeks** while ensuring reliability, rollback readiness, and alignment with stakeholder expectations.

EDUCATION

Anna University

Madras Institute of Technology

08/2018 - 07/2022

B.E. in Electronics Engineering, CGPA: 8.6

CERTIFICATION

- AZ-500 Microsoft Azure Security Engineer Associate

ACHIEVEMENTS

- The Extra Mile Award – Recognized for staying Agile, Resilient and successfully prioritizing critical tasks to work more efficiently. Commended for championing the One Accenture Culture.
