SUMMARY

Software Development Engineer with 3 years of experience in architecting responsive web interfaces, optimizing UI performance, and enhancing user experiences. Specialized in developing reusable components with React.js, managing state with Redux, styling with CSS, integrating RESTful APIs and collaborating with cross-functional teams to deliver visually engaging and business aligned web applications.

EDUCATION

Anna University
Madras Institute of Technology

08/2018 - 07/2022
B.E. in Electronics Engineering

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript
Frontend Development: React.js, Redux, HTML5, CSS3, SCSS
Backend & Databases: Node.js, RESTful APIs, SQL, MongoDB
Tools & Technologies: Jest, React Testing Library, Postman, Git, GitHub, Jira, Jenkins CI/CD

EXPERIENCE

Software Development Engineer
Accenture

10/2022 - Present
React.js, JavaScript, Redux, RESTful API, SCSS

- **Engineered** responsive and accessible web interfaces using React.js, Redux, and SASS, delivering cross-browser compatible and high-performance UI components that reduced page load times by **35%** and improved overall user experience.
- **Constructed** reusable React components, leveraging **React Hooks** and managing global state with **Redux** to optimize UI rendering, enhance maintainability, and reduce feature development time by **40%**.
- **Revamped** UI responsiveness and performance across **3** different devices and screen sizes, ensuring consistent behavior and seamless interactions, resulting in a **20%** increase in user retention and a **15%** boost in engagement metrics.
- **Implemented** scalable UI designs with React, JavaScript, and CSS, delivering high-fidelity experiences aligned with Figma specifications, achieving **98%** design accuracy and maintainable code architecture.
- **Integrated** RESTful APIs and optimized data-fetching strategies using **Axios** and **React Hooks**, enhancing payload handling and asynchronous calls to cut data-loading times by **45%**.
- **Partnered** with backend teams to align on API endpoint design, streamline data handling, and resolve integration bottlenecks, reducing feature delivery time by **25%** and lowering cross-team issue rates by **30%**.
- **Authored 150+ unit tests** using **Jest and React Testing Library**, maintaining over **90% test coverage** and reducing **production bugs** by **60%** through early detection and structured testing practices.
- **Devised** a component-driven design system supporting seamless future enhancements, reducing refactoring time by **35%** and accelerating development scalability across teams.
- **Spearheaded** Agile development practices through active sprint planning and stakeholder collaboration, ensuring 100% on-time delivery of sprint goals, improving **team velocity** by **20%** over **3** quarters, and contributing to improved release predictability.
- **Streamlined** version control and CI/CD workflows using Git, GitHub and Jenkins, automating deployments, managing **250+** code merges with **100%** delivery accuracy, and contributing to team efficiency via code review participation and pipeline enhancements.
- **Demonstrated** end-to-end deployments across development, UAT, and production environments, accelerating release cycles by **2 weeks** while ensuring reliability, rollback readiness, and alignment with stakeholder expectations.

CERTIFICATIONS

- AZ-500 Microsoft Azure Security Engineer Associate

ACHIEVEMENTS

- The Extra Mile Award – Recognized for staying Agile, Resilient and successfully prioritizing critical tasks to work more efficiently. Commended for championing the One Accenture Culture.
