SUMMARY

Software Development Engineer with 3 years of strong expertise in building high-performance, secure, and scalable web applications using **ReactJS, NodeJS, JavaScript, Redux** and **CSS**. Specialized in architecting reusable component-driven designs, optimizing UI performance, implementing RESTful APIs for front-end systems, and collaborating with cross-functional teams to deliver visually engaging and business aligned web applications.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript

Frontend Development: ReactJS, Redux, HTML5, CSS3, SCSS

Backend & Database: NodeJS, ExpressJS, RESTful APIs, SQL, MongoDB

Tools & Technologies: Jest, React Testing Library, Postman, Git, GitHub, Jira, Jenkins CI/CD, Azure

EXPERIENCE

Software Development Engineer

10/2022 - Present

Accenture

ReactJS, NodeJS, Redux, RESTful APIs, SCSS

- Engineered responsive and accessible web interfaces using **ReactJS**, delivering cross-browser compatible and high-performance UI components, reducing load times by **35%** and improving overall user experience.
- Revamped UI responsiveness and performance across **3** different devices and screen sizes, ensuring consistent behavior and seamless interactions, resulting in a **20%** increase in user retention and a **15%** boost in engagement metrics.
- Implemented scalable UI designs with **React** and **CSS**, delivering high-fidelity experiences aligned with Figma specifications, achieving **98%** design accuracy and maintainable code architecture.
- Architected and optimized **backend microservices** using **NodeJS**, building modular **RESTful APIs** to improve data handling and API efficiency, achieving up to **30%** faster response times across limited development sprints.
- Built secure and scalable **backend microservices**, implementing validation, centralized error handling, and transactional data flows to ensure data consistency across **APIs** and databases, reducing production issues by **40%**.
- Integrated **RESTful APIs** and optimized data-fetching strategies using **Axios** and **React Hooks**, enhancing payload handling and asynchronous calls to cut **data-loading times** by **45%**.
- Authored **150+ unit tests** using **Jest** and **React Testing Library**, maintaining over **90% test coverage** and reducing **production bugs** by **60%** through early detection and structured testing practices.
- Spearheaded Agile development practices through active sprint planning and stakeholder collaboration, ensuring 100% on-time delivery of sprint goals, improving **team velocity** by **20%** over **3** quarters, and contributing to improved release predictability.
- Streamlined version control and CI/CD workflows using Git, GitHub and Jenkins, automating deployments, managing **250+** code merges with **100%** delivery accuracy.
- Demonstrated end-to-end deployments across development, UAT, and production environments, accelerating release cycles by **2 weeks** while ensuring reliability, rollback readiness, and alignment with stakeholder expectations.

EDUCATION

Anna University

Madras Institute of Technology

08/2018 - 07/2022

B.E. in Electronics Engineering, CGPA: 8.6

CERTIFICATION

- AZ-500 Microsoft Azure Security Engineer Associate
- GH-300 GitHub Copilot

ACHIEVEMENTS

- The Extra Mile Award – Recognized for staying Agile, Resilient and successfully prioritizing critical tasks to work more efficiently. Commended for championing the One Accenture Culture.
