Introduction

AI/ML Engineer with 4 years of experience building and deploying scalable production ready Machine Learning, and Generative AI solutions. Strong expertise in feature engineering, predictive modelling, applied Gen AI use cases with hands-on exposure to LLMs, RAG, embeddings, prompt engineering, vector databases, and AI application development. Keen to build and contribute to production-grade Machine Learning, Gen AI and Agentic AI solutions. Strong problem-solving mindset with a focus on translating data and AI capabilities into scalable, business-oriented solutions.

Relevant experience

- Built ML solutions across healthcare predictive analytics, sales forecasting and telecom network performance & recommendation systems, using PySpark for large-scale data processing and applying feature engineering, predictive modeling, and anomaly detection.
- Developed RAG-based GenAI applications using LLMs, embeddings, VectorDB, semantic search and optimized chunking strategies using NLP.
- Developed use cases like Text-to-SQL GenAI solution for natural-language interaction with structured data & SQL-based analysis and custom Gen AI chatbot enabling conversational access to business information.
- Deployed end-to-end ML and GenAI solutions, exposing backend services through FastAPI endpoints and building responsive user interfaces in React.js, with Docker containerization and CI/CD pipelines for automated deployments.

Background and interests/professional affiliations

- Education: B.E, ECE - Anna University, Madras Institute Of Technology (2018 – 2022)
- Technologies: Python, Machine Learning, Gen AI, RAG, NLP, Lang Chain, LLMs, Agentic AI, Scikit-Learn, Tensor Flow, PyTorch, FastAPI, React.js, SQL, PySpark.
- Passionate about exploring and applying ML, Generative AI, LLM applications, RAG, agentic AI, AI automation, and emerging technologies to solve enterprise business problems continuously develops expertise in new AI/ML frameworks and technology trends.
